About Me

Hello! I'm Saifullah, but feel free to call me Iful or Ipul. I'm a 22-year-old web development enthusiast from Meulaboh, West Aceh, Indonesia. With 3 years of academic background in Computer Science at Teuku Umar University, my journey in programming began in 2020 with C++. Since then, my passion has evolved toward web development, where I now focus on building dynamic web applications using Next.js and Laravel. I'm always eager to learn and take on new challenges to sharpen my skills in creating efficient and user-friendly digital experiences.

Skills

Skillset – Problem Solving, Critical thinking, Web Development, Front-End Development.
Toolset – React.js Next.js Node.js, Express, Laravel, MongoDB, Figma, Redux.

Language

Indonesian – Native profiency (oral and written)
English – Profesional profiency (written)

My Project Recent

NutrixSense

This project is an application designed to detect 10 classes of Indonesian food and calculate daily calorie intake. Built using Next.js with TypeScript, it leverages Prisma as the ORM, Supabase as the database, and TailwindCSS for the UI styling. The food detection functionality is integrated with the YOLOv8 model to identify food objects. You can access the GitHub repository via this link: https://github.com/koreoxy/nutrixsense

Sihati-Siswa

The Sihati-Siswa project is an informational website system designed for junior high school students to share their thoughts and experiences through an online platform. Built using Next.js, TypeScript, and TailwindCSS, this web application allows students to engage in personal reflection and storytelling. The live version of the website can be accessed at the following link: https://sihati-siswa.vercel.app/
